ITS STANDARDISATION IN EUROPE

TOWARDS CONNECTED AND AUTOMATED MOBILITY

- ❖ ITS standards – Support to EU policies
- ❖ How to achieve it
- ❖ EC support to standardisation
- ❖ The case of eCall
- ❖ International cooperation

ITS Standards and European Policies

• Roadmap to a Single European Transport Area

Towards a competitive and resource efficient transport system

- **To meet the challenges**, transport has to:
 - Use less energy
 - Use cleaner energy
 - Exploit efficiently a multimodal, integrated and 'intelligent' network
- Curbing mobility is not an option
- **By 2050 reduce emissions by 60%**, and 20% by 2020 (2008 level)
- **By 2050 move close to zero fatalities** in road transport, halving road casualties by 2020

DAE: "Every Car Digital, Every Car Connected"

WHY DO WE NEED ITS STANDARDS?

- **Encourage innovation**, foster enterprise and open up new markets for suppliers
- **Create trust and confidence** in products and services
- **Expand the market**, brings down costs and increases competition
- Helps to **prevent duplication of effort**
- Supports greater **confidence in procurement**
- **Interchangeability** of system component suppliers
- Enable **interoperability** of systems/services

HOW TO ACHIEVE IT: COOPERATION

- ✓ *Active and fair involvement of all the relevant stakeholders*
- ✓ *Support from RTD projects, validation and fine-tuning through field operational tests, pilots*
- ✓ *Cooperation among the different standardisation organisations and groups*
- ✓ *International cooperation*

EC SUPPORT TO STANDARDISATION

Instruments:

- Setting of the priorities : *ITS Directive legal Framework (2010/40), Radiospectrum Decision 2008/671/EC; Communications (EU-C-ITS Strategy, 5G AP)*
- Research Framework program/ H2020/ CIP / C-Roads / PPP
- EC Mandates for standardisation

Groups:

- ITS Committee; ITS Advisory group
- ITS Standardisation Coordination Group
- iMobility Forum
- C-ITS Platform
- EATA, 5GPPP

Support to International Cooperation

Funding of standardisation activities:

- ***Mandates and ICT Standardisation Rolling Plan***
 - Specialist Task Forces on EETS
 - Specialist Task Forces on coop. systems
 - Specialist Task Forces on eCall
 - Specialist Task Forces on Urban ITS
- ***Results from EU funded RTF projects/FOTs/Pilots***

CAVs standardisation overview

-Public service 112-based only
 -Voice + MSD to relevant PSAP
 -112-based, with or without
 intermediation platform under
 Public delegation

ETSI-MSG & 3GPP. Chair: N. Sampson

In-band modem trx

eCall NAD conformance specs:

- ETSI TS 102 936-1 ✓
- Protocol test specification
- ETSI TS 102 936-2 ✓
- Test Suites
- ETSI TR 102 937 ✓
- eCall Comm. equipment:
Conformance to EU regulations

- ETSI TS 126 267
- "eCall Data Transfer - General Description" ✓
- ETSI TS 126 268
- "eCall Data Transfer. ANSI-C Reference Code" ✓
- ETSI TS 126 269
- "eCall Data Transfer. Conformance testing" ✓
- ETSI TR 126 969
- "eCall Data Transfer. Characterisation Report" ✓

CEN TC 278 WG 15. Chair Bob Williams

International Cooperation

Global harmonisation of standards for Cooperative Systems

- » **Memorandum of Cooperation** agreed between ETSI and U.S. DoT RITA
- » **Harmonization Action Plan** process for finalising internationally harmonized standards
- » **Harmonization Principles** suggest policies to be followed in the harmonization
- » **Harmonization Task Groups (HTGs):**
 - » HTG1: Management and security (complete)
 - » HTG2: Vehicle Safety Message (complete)
 - » HTG3: 5.9GHz protocol harmonization (complete)
 - » HTG4: Roadside messages (under way)
 - » HTG5: Intersection messages (under way)
 - » HTG6: Security Policy (started Jan 2014)
- » HTG reports issued and being applied by SDOs. Available on EU/US official sites:
 - » http://www.its.dot.gov/connected_vehicle/international_research.htm
 - » <http://ec.europa.eu/digital-agenda/en/news/progress-and-findings-harmonisation-eu-us-security-and-communications-standards-field>
- » MoC with Japan (MLIT)

Benefits:

- ✓ reducing development costs
- ✓ getting to global markets
- ✓ avoiding duplication of efforts
- ✓ generating economies of scale

Source: COMeSafety2 project

CONCLUSIONS

- ✓ *CAVs have the potential to contribute tackling the mobility challenges in Europe and worldwide*
- ✓ *Standards are needed for wide take-up of ITS*
- ✓ *Stakeholders and SDOs cooperation is paramount*
- ✓ *Importance of international cooperation/ global harmonisation*
- ✓ *Release 1 important milestone. In the right track towards deployment. Pilots and pre-deployment.*

**Thank you for
your attention**

धन्यवाद
